Best Practice for Installing the Bizimply Timestation

The Bizimply Timestation uses a camera to detect faces during clock-in and clock-out. For accurate and reliable performance, it's important to install the device at the correct height and angle.
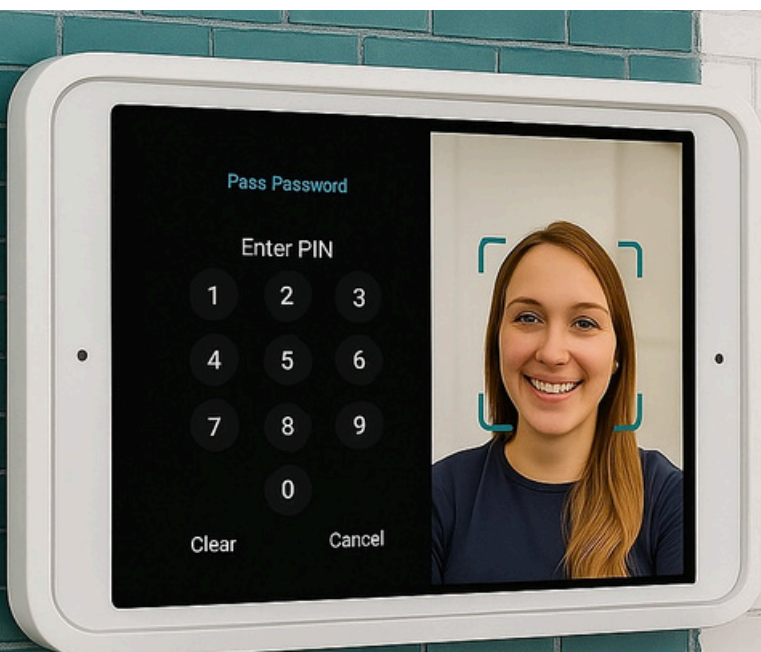

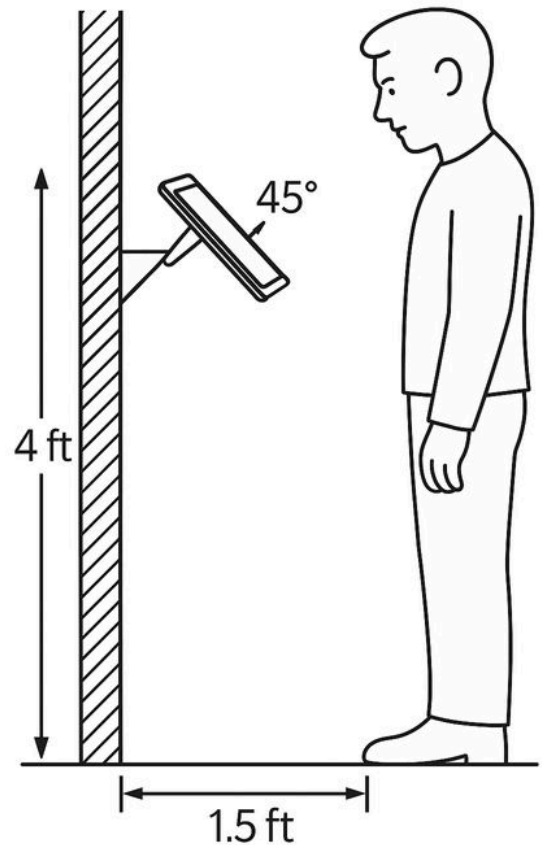

The goal is to ensure that employees are looking slightly downward into the iPad camera, which improves face detection accuracy and photo quality.

Recommended Installation Height
Mount the Timestation approximately 4 feet from the floor. Depending on your staff's average height, this height may need slight adjustment.

Optimal Device Angle
The iPad should be angled upward at approximately 45 degrees, whether mounted on a wall or placed on a desk. This setup ensures the camera has a clear, unobstructed view of the user's face.

To get the best results from facial detection with the Bizimply Timestation, we strongly recommend mounting your iPad using a secure bracket. Based on our testing, a proper mount significantly improves face detection accuracy and overall user experience.

Note: iPads come in a range of sizes depending on the generation.
The most common models used with Bizimply are:
- 10.2″ (7th, 8th, and 9th generation)
- 10.9″ (10th and 11th generation

Recommended Wall Mounts
We recommend Beelta Tablet Mounts – they're reliable, affordable, and easy to install. These mounts can be wall-mounted or placed on a counter, depending on your requirements;

✅ For iPad 10.2″ (7th, 8th, 9th Gen)
- Mount: Beelta Wall Mount for iPad 10.2-inch
- Price: £48.50
- **View on Amazon**

✅ For iPad 10.9″ (10th Gen) or 11″ (11th Gen)
- Mount: Beelta Wall Mount for iPad 10.9-inch
- Price: £56.00
- **View on Amazon**

How to Check Your iPad's Generation
To confirm your iPad model:
Go to Settings > General > About
Look at "Model Name"
If it says something like "iPad (6th Generation)", that's all you need.
If the generation isn't shown:
Tap on "Model Number" (it may start with "M" or "A")
Copy that number (e.g. MR7F2B/A or A2197)
Paste it into Apple's official model lookup:
👉 **Apple iPad Model Guide**
This will confirm which generation you're using so you can choose the correct mount.
